Arbitrator 1.9.2.14 Release Notes

Changes

- Fixed bookmark defect when used in Canada region.
- Fixed defect where multiple configurations sent from the update service in succession would not apply.
- Fixed intermittent defect that caused uploading to CMS of the same video file.
- Fixed intermittent defect where files do not get deleted from the P2 card when exporting.
- Fixed numerous DVD burning bugs. Thanks to Utah beta site.
- Fixed intermittent bug where files were not deleted after a burn process.

Additions

- Auto Login/Login feature option: The SI will now accept a configuration on to leave officer information meta-data or remove it upon logoff.
- Burn to Authored DVD.
- Optimized navigation speed in UI.
